RESEARCH, DEVELOPMENT & PRODUCT OPTIMIZATION

Turn product ideas into manufacturable formulas with commercial polish.

Great products need more than a good ingredient list. GIH helps brands think through format, feasibility, production, compliance, packaging, and scale before launch.

- ✓ Custom formulation support**
Develop or refine formulas for capsules, gummies, powders, liquids, topicals, and other supplement formats.
- ✓ Manufacturability review**
Translate product concepts into formulas and processes that can be produced consistently.
- ✓ Quality-minded development**
Align product development with NSF GMP, GMP, ISO 9001:2015, and documented quality expectations.
- ✓ Launch pathway support**
Move from R&D into packaging, labeling, inventory, 3PL, and online-channel growth.

CAPABILITIES

R&D services support

New product concepts

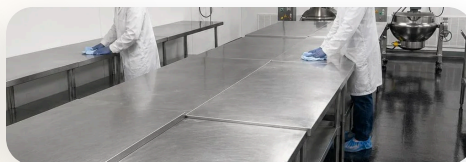

Formula optimization

Format selection

Ingredient review

Pilot-to-scale planning

Packaging strategy
